STAYmyway Air

Unlock common area doors remotely with your smart phone, without the need for approval from the condominium association

UNLOCK DOORS REMOTELY

· Our system allows you to unlock doors from any computer, smart phone or tablet.

MONITOR BATTERY LEVELS FROM THE CLOUD

· You can monitor the battery levels of your STAYmyway devices anytime, anywhere.

BLOCK ACCESS REMOTELY

· STAYmyway Air allows you to block access through the control panel.

HIGH LEVEL SECURITY

· SSL and AES128 Encryption. Security audit performed by PROSEGUR.

UNLOCK HISTORY

· Track who, when and how guests gain access to your properties from the STAYmyway dashboard.

Building access via smartphone

Open any door in the building or common areas with your smart phone, in person or remotely from your computer.

No approval needed from the Condominium association

STAYmyway Air doesn't need authorization from the Condominium association since nothing is installed in the common areas. Our system is installed in the existing intercom in your condo, flat or apartment.

Secure Technology

Protect your condo and your guests with STAYmyway Air. You decide who gets in and when, with the ability to remotely revoke permission at any time using STAYmyway's management tool located in the cloud.

Save time and money

Remotely unlock the door for your guests, or allow them to open doors to common areas with a smart phone, avoiding extra trips to drop off keys.

MAIN FUNCTIONS

- Unlock doors via smart phone
- Unlock doors Remotely
- LED Status Indicators
- Download unlock history
- Battery Levels

SUPPORTED DEVICES

STAYmyway Air is compatible with STAYmyway Cylinder, STAYmyway Open and STAYmyway Wall.

CERTIFIED BY PROSEGUR

The most secure connection protocols are used for all communications. All communications are encrypted with AES128 on independent servers, which provide a robust, reliable and secure environment.

INSTALLATION

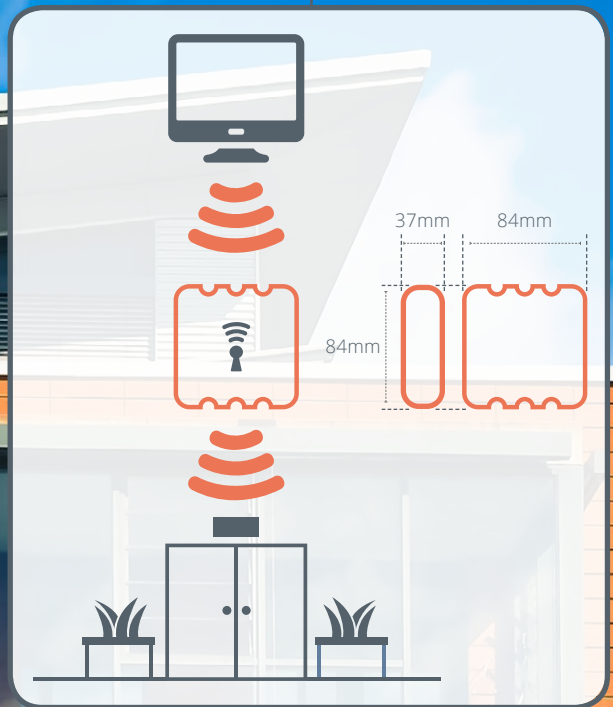

Our technicians will install STAYmyway Air in 20 minutes and from this point on you can unlock the door to your building remotely using your smartphone.

CONFIGURATIONS

STAYmyway Air can be configured using any cell phone - all you need is the name of your wifi network and the password.

STAYmyway Air

Unlock common area doors remotely with your smart phone, without the need for approval from the condominium association

Dimensions: 84mmx84mmx37mm

Wi-Fi Interface:

Technology: IEEE 802.11 b/g/n

Range of Frequencies: 2.4 GHz ~ 2.5 GHz (2400M ~ 2483.5M)

Transmission Power: +22dBm maximum peak

Reception Sensitivity: -98dBm

Bluetooth Low Energy (BLE) Interface:

Technology: IEEE 802.15.1

Range of Frequencies: 2.4 GHz ~ 2.5 GHz (2400M ~ 2483.5M)

Transmission Power: +5dBm

Reception Sensitivity: -97dBm

Power: Input: 230V AC

Connection Plug

Power Consumption: <100 mA

Temperature Conditions:

Operating Temperature: from -10oC to +70oC

Security: IP65

Humidity: From 5% to 95% without condensation.

User interface.

LED Status Indicators

Reset and Configuration Buttons
